الاتحاد من أجل المتوسط

The Interreg Euro-MED Programme 2021–2027

4 interconnected and complementary missions to reach a climate-neutral and resilient society!

Innovative sustainable
economy

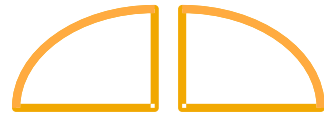

Natural heritage

Green living areas

Sustainable tourism

Community4Nature  Dialogue4Nature
e

- **Create Communities of Practice**
- **Study and assess the transferability of results**
- **Promote the reuse of solutions and their transferring to other territories**
- **Promote policy harmonization and innovative governance practices**
- **Establish a dialogue to mainstream solutions to effective policies**

The Natural Heritage Projects

Thematic Categories

Check the complete set of projects in the Mission's [website](#) and discover the diversity of topics and approaches.

Risk management of climate change impacts

Reduction of anthropogenic pressures in coastal areas

Protecting and restoring the marine environment

Solutions and tools for wetlands

Soil carbon farming

Forest management

Natural heritage

Interreg Euro-MED

Co-funded by the European Union

The Amplification Room

Portfolio of services

The **Amplification Room and its portfolio of services** is a “space” in which the Community comes together and opens to new external actors with the aim to facilitate transference in practice.

- Capacity building (*Peer review and transferability analysis, Catalogues/Library*)

- Fostering adoption (*Working groups, Clusters and Mentorship programme*)
- Policy mainstreaming (*Common policy statements, Annual Institutional Dialogues, Policy mapping and advocacy*)

CARBON 4 SOIL QUALITY

Peer Review Cluster

- Support in the collection, analysis, dissemination and transference of the project's key results and messages
- Enhance transference to target audiences / real world settings

It is a focussed conversation with experts who did not participate in the project development with the aim to contribute with critical perspectives on the project results, identifying leverage points for boosting transference towards target audiences, foster adoption and replication, as well as to profile concrete opportunities to strengthen the projects' societal impact.

CARBON 4 SOIL QUALITY

Policy/Practice Empowerment

Thematic Working Groups = a space for networking, capacity building and producing knowledge, i.e., policy papers and briefs zooming in on specific EU, Mediterranean and International issues.

CARBON 4 SOIL QUALITY was part of the WG.2 on Overcoming Local Barriers for Climate Change Adaptation and WG.4 on Ecosystem Restoration and Nature-based Solutions.

CARBON 4 SOIL QUALITY

Policy/Practice Empowerment

Integrated & ecosystem based governance -

Building on MSP/ICZM, promote integrated planning & just transition, ensuring that restoration and conservation efforts for terrestrial, freshwater, and wetland ecosystems deliver tangible social and economic benefits, including local job creation, livelihood diversification, and participation in carbon markets.

Innovation, financing & knowledge systems - Develop and test Innovative financing mechanisms and partnerships, such as carbon markets, Payment for Ecosystem Services (PES) schemes, and blended public–private investments, ensuring the long-term economic viability of restoration actions & Develop an ambitious research, training and innovation agenda, fostering cross disciplinary collaboration, applied research, and technology transfer to scale up nature based solutions and bridge the science–policy gap.

Together to raise awareness

“SOLVE the CHALLENGE” awareness campaign

ARTICLE

Carbon farming for a climate-resilient Mediterranean: Our contribution to the European Geosciences Union (EGU) General Assembly 2025

[#SolveTheChallenge2025](#)
[#environmentalgovernance](#)

“
What surprised you in the international debate when this topic was raised by the other scientists?

It was the deeply rooted human drive for discovery, and how passionately so many scientists dedicate themselves to research. I was particularly inspired by the emphasis on applied research — such as the work being done on Carbon Farming — where scientific knowledge is actively translated into practical solutions. It's encouraging to see this collective effort aimed at addressing the major environmental and societal challenges we face, both now and in the near future.

Nicola Dal Ferro
Associate professor at the University of Padova
